(1) "The Fantasy RPG You've Been Waiting For" Subscription Fantasy RPGs are still very popular today. From Dragon Quest to Final Fantasy, these titles are undoubtedly still enjoyed by many today. In contrast, an online RPG in which players battle each other freely - or even alone - is extremely rare. In fact, only a small number of MMO games in the genre even exist today. However, the fantasy classic, Final Fantasy, was the first to receive support from a large-scale PC online game service, providing a background for other developers to take similar action. And, as with its predecessors, Final Fantasy XIV: A Realm Reborn is now preparing to become an online game that can support both on-site and remote players, and as a result, both existing subscription games and previously-untapped online market will benefit from this technology. (2) "Powerful People Management" and "Character Gains and Friends" In Final Fantasy XIV: A Realm Reborn, the job system is a very important element, and the names of the jobs are all drawn from the game world. By improving certain skills through certain jobs, you will be able to improve your character's rank, and thus create a feeling of personal growth, which is different from the "titles" you get in traditional RPG games. In addition, by being near others, you will be able to further build your relationship with them, and the relationships with the characters will have an impact on your job advancement. Finally, by expending the "ally" points you gain by helping others, you will be able to add additional characters to your friend list. (3) "Equipment" The equipment system in Final Fantasy XIV: A Realm Reborn, called "device", aims to create a unique experience for each character by allowing the players to freely combine gear from anywhere in the world. By equipping a "device" which has a specific function and using it correctly, you will be able to obtain unique skills, and you will be able to receive additional benefits. Currently, "Weapon" and "Armor" exist as two categories of "Device", and they can be further combined with "Magic" or "Healing". (4) "Battle" The battle system features "Auto-Battle", which creates battles at all times, with the possibility of working together with allies to defeat enemies. You can also choose to "Single-Battle", which is a combat mechanism that
